

Get ready to see your child's grades on line with

Starting on September 19, parents will have access to each student's grades through OptionC, our web-based student information system. Families will be given a username (login name) for EACH child.

In order to prepare for parent access to student grades online, send the following to optionc@ctk.org by Wednesday, September 17:

1. Your primary email address where you wish to receive your login information (we'll assume you want to use the account you're sending the message from unless you tell us differently.)
2. Desired password or passwords. You can use the same password for each child if you wish (each child will have a different username.) If you wish to use different passwords, please clearly identify which password for which child.

Bear in mind that anyone who has the username and password will have access to your child's information, so please keep this information secure – treat it like your bankcard PIN code.

When your email address and password is in our system, an email will be sent out September 19 with information about how to login for you to have access to each child's grades and assignments.

We are excited to offer this to our parents and appreciate your help in getting this off the ground!
